BEHR HELLA SERVICE

The Thermal Management Expert for passenger cars and trucks

With over 7,700 quality articles in over 20 product groups, Behr Hella Service offers unequalled market coverage. Our customers profit from the know-how of Behr and HELLA, and the high degree of service competence in supplying parts and providing technical information, training for both the independent aftermarket and independent garages, and also benefit from the sales promotion offered. For you, this means an ideal combination of products and competence: HELLA's global sales organization plus BEHR's OE product know-how, as well as the linking of activities in the field of vehicle air conditioning and engine cooling.

In the second quarter 2017 Behr Hella Service has launched 120 new products.

HIGHLIGHTS

- **47 PREMIUM LINE Articles** – 14 products produced by Visteon, 4 articles produced by BEHR and 4 E-compressors produced by SANDEN, among others
- **2 climate compressors** for BMW 1 Series / 3 Series / X1 Series / X3 Series
- **1 climate compressor, 3 filter-dryer and 5 coolant radiators** for SUV like Ford Kuga, Nissan Qashqai or VW Tiguan.
- **"Triple Strategy" coolant radiators.** Details can be found in the "News" section at the end of the flyer.

NEW PRODUCTS

| Part number | Description | Car application | OE-number* | Type of vehicle | Version | PREMIUM LINE |
|-----------------|-------------|---------------------------|---------------------|-----------------|---------------------|--------------|
| 8FC 351 001-711 | Condenser | JAGUAR XJ | C2D21418+ | Passenger Car | produced by VISTEON | ■ |

The new SANDEN electric compressors. Exclusively from BEHR HELLA SERVICE.

The thermal management expert, Behr Hella Service, has further expanded its extensive range of compressors: The range now also contains the latest generation of electrically driven, vehicle-specific units from the compressor specialist SANDEN – exclusively sold on the Independent European Aftermarket by Behr Hella Service.

Behr Hella Service

The expert for vehicle air-conditioning and engine-cooling systems, has been combining excellent service skills with a broad product range for over 10 years

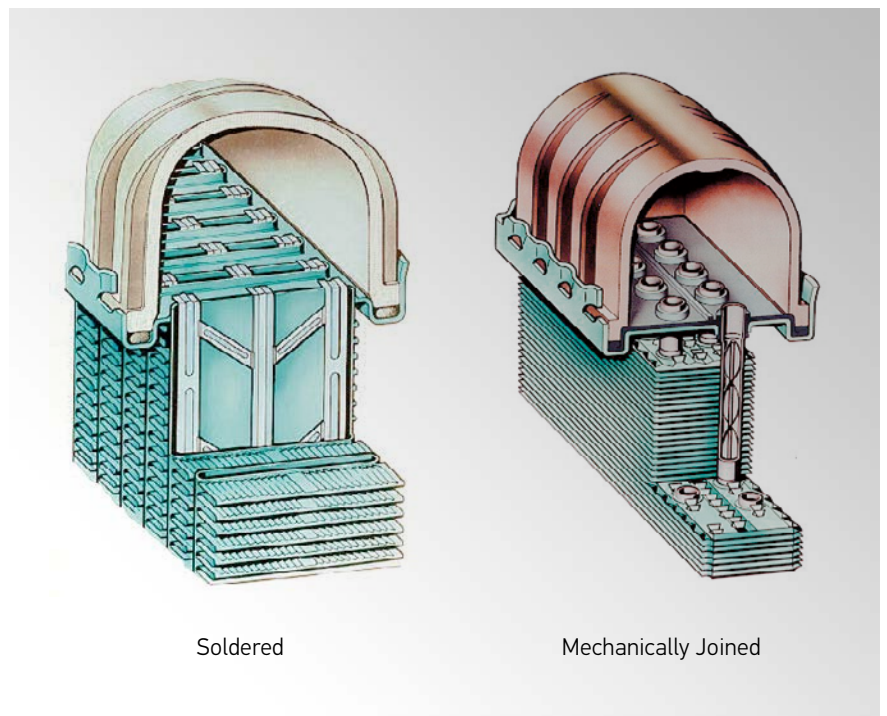

SANDEN

The compressor specialist, equips almost 25 % of the air-conditioned vehicles worldwide with compressors. In 1990 SANDEN had already developed the first electric compressor for purely electric vehicles – and today still possesses various electric compressor patents.

Coolant Radiators: The Variants

During manufacturing, there are basically two different kinds of production techniques which are used: the components can either be mechanically joined together or they are soldered. The technical performance data of both manufacturing processes can be viewed as approximately identical. The only real difference is that the mechanically joined variation is lighter in weight. It is the vehicle manufacturers who ultimately decide on which process will be put into series production.

The construction of the radiator's pipe geometry / fin geometry is vital for the performance of each variant. And also the space available in the vehicle is to be factored into the equation.

Soldered

Mechanically Joined

A Comparison between Soldered and Mechanically Joined Radiators

The following table gives an overview of the major differences between the radiator variants.

| | Mechanically Joined | Soldered |
|---------------|--|--|
| Pipes | Oval or round | Brazed flat pipes, reinforced by bending or by corrugating |
| Fins | Punched, inserted | Rolled corrugated fins |
| Connection | By widening of the pipes and inserting | By soldering |
| Miscellaneous | Less weight | <ul style="list-style-type: none"> • Usually a flat pipe sufficient for the entire system depth • The height of the component governs the number of flat pipes |

The fundamental aim of Behr Hella Service is to provide the variant installed by the manufacturer.

As a result of market demands, in certain instances Behr Hella Service has both variants available in its product range.

A NEW PRODUCT MARKING FOR YOUR SUCCESS:

Our new branding concept now offers you even more transparency. A new marking system makes distinguishing and differentiating the approximate 4,500 articles making up the PREMIUM LINE and the around 3,000 Standard range child's play. The articles which were previously marked as an „Alternative Model“ now - just like those in the standard program - will be furnished with the Behr Hella Service logo and will not include any additional designation. This means that you will be able to recognise at a glance if it is a PREMIUM LINE product or a Standard one.

Detailed information can be found at www.behrhellaservice.com/premiumline.

Your advantages

- Unique quality distinction.**
Increased transparency through informative product marking.
- Increase customer satisfaction.**
With the unique product marking, you can be sure what is being delivered.
- You can profit with minimal effort.**
Article numbers, product quality, price level and service remain unchanged.
- You have the choice!**
In many cases, you will continue to have the choice between premium or standard products.

**BEHR HELLA SERVICE PREMIUM LINE –
The ideal solution for customers who expect the optimum.**
