New to Range
SECOND QUARTER 2018

BEHR HELLA SERVICE

THE THERMAL MANAGEMENT EXPERT FOR PASSENGER CARS AND TRUCKS

With over 7,700 quality articles in over 20 product groups, Behr Hella Service offers unequalled market coverage. Our customers profit from the know-how of Behr and HELLA, and the high degree of service competence in supplying parts and providing technical information, training for both the independent aftermarket and independent garages, and also benefit from the sales promotion offered. For you, this means an ideal combination of products and competence: HELLA's global sales organization plus BEHR's OE product know-how, as well as the linking of activities in the field of vehicle air conditioning and engine cooling.

In the second quarter 2018 Behr Hella Service has launched 99 new products.

HIGHLIGHTS

- **52 PREMIUM LINE Articles** – among others 8 products produced by BEHR and 13 articles produced by VISTEON
- **2 air conditioning compressors** for the BMW X 1/2 range
- **3 evaporators** for the MB S Class (version with new refrigerant R744 respectively CO₂)
- **One electrical water pump** for BMW 3 (E91) / 5 (E60)

NEW PRODUCTS

Behr Hella Service introduces QR codes on packaging

All product information available on your smartphone

Thermal management expert Behr Hella Service will from now on print a QR code on all product packaging labels. This will enable wholesalers and workshops to get all product information on their smartphones. The information comprises current images, vehicle applications and OE numbers from the online catalog. But also 360 degree images, material safety data sheets and installation notes are easily available via scan now. All this information is furthermore available in 18 languages. Scanning the code is possible with a so-called QR scanner available at no cost at Google Play or in the app store. It can be installed as app directly on the phone.

For having at your disposition important information directly on site, Behr Hella Service QR has integrated QR codes not only on packaging labels but also in the recently published print catalog „Thermal Management Trucks & Transporters“. Additional catalogs with QR codes will probably soon follow. This will allow finding updated product information even quicker soon.

Components for the new refrigerant R744/CO₂

Naturally occurring carbon dioxide (R744) is used as an additional alternative refrigerant: This is considered to be particularly environmentally friendly, and exhibits a very low GWP value of 1. However, the thermodynamic properties of R744 fundamentally differ from the chemical alternatives R134a

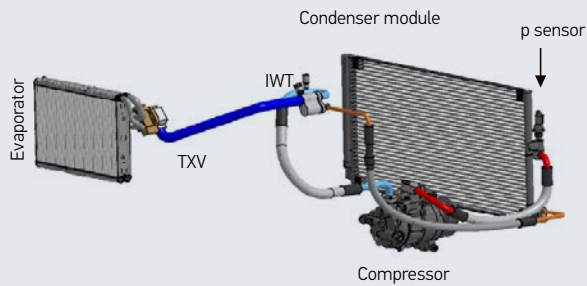

and R1234yf used up until now. Particularly the high pressure levels in the air-conditioning system result in altered requirements and necessary modifications to the refrigerant circuit for R744 systems and the associated components.

One particular challenge in this case is ensuring that the refrigerant circuit is leak-tight. The small size of the molecules and the high CO₂-permeability of conventional polymer hoses necessitate the use of metallic sealing rings and flexible, coated polymer hoses. Furthermore, corrugated stainless steel hoses are required downstream of the compressor on the hot gas line. Behr Hella Service is one of the first suppliers to exclusively stock selected components for R744 refrigerant circuits for the independent parts market. In doing so, Behr Hella Service combines the OE know-how of BEHR, the developer of the world's first R744 air-conditioning system, with the sales expertise of HELLA. The components are perfectly tailored to the respective system conditions and satisfy the most stringent requirements in terms of functionality and operational safety.

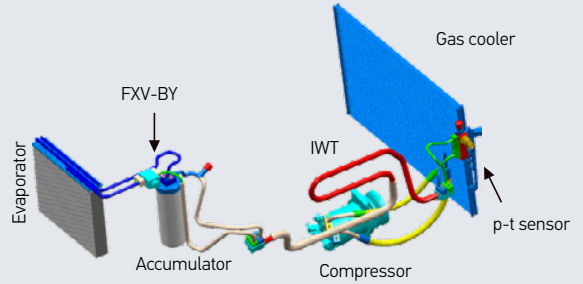

SYSTEM COMPARISON

R134A / R1234YF

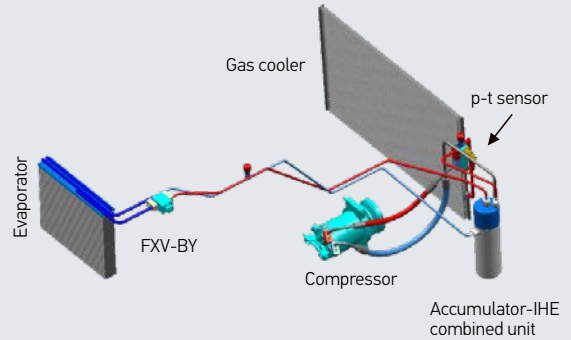

TXV: Thermal expansion valve
 FXV-BY: Fixed restrictor with bypass valve
 IHE: Internal heat exchanger
 p sensor: Pressure sensor
 p-t sensor: Pressure-temperature sensor

R744 WITH ACCUMULATOR/IHE

PREMIUM LINE

Both the electrical water pumps and the exhaust gas recirculation radiators are part of the Behr Hella Service PREMIUM LINE range that comprises over 4.500 articles – the ideal solution for customers who expect the optimum.

Watch our PREMIUM LINE video and get all the information about the advantages and easy product identification!

Your advantages

- ✓ **Unique quality distinction.**
Increased transparency through informative product marking.
- ✓ **Increase customer satisfaction.**
With the unique product marking, you can be sure what is being delivered.
- ✓ **You can profit with minimal effort.**
Article numbers, product quality, price level and service remain unchanged.
- ✓ **You have the choice!**
In many cases, you will continue to have the choice between premium or standard products.

**BEHR HELLA SERVICE PREMIUM LINE –
The ideal solution for customers who expect the optimum.**
