THERMAL MANAGEMENT

New to Range
THIRD QUARTER 2018

BEHR HELLA SERVICE

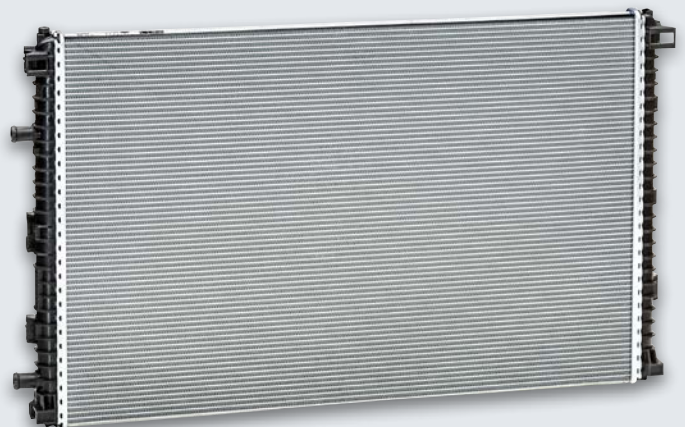

THE THERMAL MANAGEMENT EXPERT FOR PASSENGER CARS AND TRUCKS

With over 7,700 quality articles in over 20 product groups, Behr Hella Service offers unequalled market coverage. Our customers profit from the know-how of Behr and HELLA, and the high degree of service competence in supplying parts and providing technical information, training for both the independent aftermarket and independent garages, and also benefit from the sales promotion offered. For you, this means an ideal combination of products and competence: HELLA's global sales organization plus BEHR's OE product know-how, as well as the linking of activities in the field of vehicle air conditioning and engine cooling.

In the third quarter 2018 Behr Hella Service has launched 95 new products.

HIGHLIGHTS

- **35 PREMIUM LINE Articles** – among others 15 products produced by BEHR and 5 articles produced by VISTEON
- **2 low temperature radiators** for the Audi Q7 Hybrid (produced by VISTEON) and MAN TGX (produced by BEHR)
- **7 expansion valves** for Mercedes Benz and BMW vehicles

Thermal management solutions for electric mobility

Behr Hella Service at Automechanika 2018

For increasing the range and the battery lifespan of hybrid and electric vehicles, an efficient thermal management is of central importance. The thermal management expert Behr Hella Service presented product solutions for an intelligent thermal management at this year's Automechanika in Frankfurt on the Main.

At the leading international fair for the automotive aftermarket, Behr Hella Service for example illustrated via a sample how cooling and air-conditioning circuits are designed in hybrid and electric vehicles. The air-conditioning compressor is the heart of the air-conditioning system. Via a sectional model, interested fair attendees could take a closer look at an e-compressor. Furthermore, Behr Hella Service presented electric coolant pumps enabling efficient cooling in hybrid and electric vehicles since they only carry coolants when necessary. Electric coolant pumps are also no longer coupled to the drive motor and are therefore also available during the stop phases of the start/stop automatic system.

Additional to products for the thermal management in hybrid and electric vehicles, Behr Hella Service also showed solutions for conventional thermal management. To this end, the company

used an interactive model to illustrate the workings of the air conditioning-circuit. Typical error patterns and causes of an air conditioning compressor damage had been shown at an information pillar.

As a further highlight, Behr Hella Service presented products promoting sustainability. With a view to minimizing emissions of nitrogen oxides (NOx) and in order to observe the tough Euro 6 limit values, the company is now also offering e.g. exhaust gas recirculation radiators (EGR radiators). As one of the first providers on the independent aftermarket, the thermal management expert is furthermore offering selected components for R744 refrigerant circuits.

PREMIUM LINE

The low temperature radiators mentioned in this edition are part of the Behr Hella Service PREMIUM LINE range that comprises over 4.500 articles – the ideal solution for customers who expect the optimum.

Watch our PREMIUM LINE video and get all the information about the advantages and easy product identification!

Your advantages

- ✓ **Unique quality distinction.**
Increased transparency through informative product marking.
- ✓ **Increase customer satisfaction.**
With the unique product marking, you can be sure what is being delivered.
- ✓ **You can profit with minimal effort.**
Article numbers, product quality, price level and service remain unchanged.
- ✓ **You have the choice!**
In many cases, you will continue to have the choice between premium or standard products.

**BEHR HELLA SERVICE PREMIUM LINE –
The ideal solution for customers who expect the optimum.**
