

Smooth air-conditioning check: Behr Hella Service offers components and training sessions to independent workshops

- **Comprehensive range of vehicle parts, including components for electric and hybrid vehicles**
- **Digital support with up-to-date training sessions and repair instructions in HELLA TECH WORLD**

Schwäbisch Hall, January 29, 2019. Thermal management experts Behr Hella Service have put together a comprehensive service package to support independent workshops with air-conditioning checks to start off the air-conditioning season 2019. As the "workshop's friend", the company offers a high-quality range of vehicle parts, including components for electric and hybrid vehicles, comprehensive technical service, support with professional compressor replacement, as well as individual sales support.

Against the backdrop of increasing electrification within the automotive industry, Behr Hella Service is continuously expanding what it has to offer for hybrid and electric vehicles. In addition to conventional products such as coolant radiators, when it comes to hybrid vehicles with internal combustion engines, special "e-mobility components" such as electric air conditioning compressors including oils, round off the range. Sanden electric air conditioning compressors have been part of the Behr Hella Service range in the independent European aftermarket since July 2017. The company is also currently expanding their range to include "electric water pumps".

Professional compressor replacement is still an important topic in vehicle workshops. Behr Hella Service has also updated the free compressor app – fitting for the beginning of the air conditioning season. This app makes the necessary refrigerant and compressor oil fill quantities for the respective vehicle easily accessible.

All expert knowledge, also about thermal management in electric and hybrid vehicles in particular, is freely available in HELLA TECH WORLD. The platform allows independent workshops to find technical videos, information about operating modes, as well as

PRESS RELEASE

repair tips. HELLA has, for example, updated the know-how tool. Users can inspect the respective components and obtain information about possible malfunctions and their remedies, at just the click of a mouse. The online offer is rounded off by additional informative material about air-conditioning checks, updated fill quantities, checklists, and technology clips with instructions all about smooth repairs in the areas of air conditioning and engine cooling.

Behr Hella Service GmbH, Schwäbisch Hall: The joint venture between automotive parts suppliers MAHLE Behr (specialist for vehicle air conditioning and engine cooling) and HELLA (specialist for components and systems for lighting technology and electronics) serves the global independent aftermarket for vehicle air conditioning and engine cooling parts. The joint venture combines MAHLE Behr Service's activities on the independent aftermarket and the air-conditioning business of Hella's aftermarket activities. MAHLE Behr and HELLA each have a 50 percent share in the joint venture. The combination of HELLA's global sales organization with MAHLE Behr's product expertise and the linking of activities in the field of vehicle air-conditioning and engine cooling for the parts business have brought about the logical further development of the previous cooperation between MAHLE Behr and HELLA in the field of climate control and front-end modules.
