

## **Behr Hella Service engaged in large-scale expansion of its thermal management portfolio**

- **New PREMIUM LINE and standard articles for cars, transporters, commercial vehicles and also for agricultural and construction machinery**
- **Special products for electric/hybrid vehicles complete the range**

**Schwäbisch Hall, August 13, 2019.** Thermal management expert Behr Hella Service is expanding its product portfolio by around 850 new products for passenger cars, transporters, commercial vehicles and also agricultural and construction machinery. Around half of these are PREMIUM LINE articles, i.e. products turned out by manufacturers with original equipment expertise such as BEHR and VISTEON. And about half of the articles making up the expansion of the range are already available. The other articles will follow in the summer of 2019 or by the end of 2019 at the latest. But all products can already be found in the TecDoc vehicle and spare parts catalogue.

The highlights of the expanded range in the field of vehicle air conditioning include numerous new air conditioning compressors and condensers. In the area of engine cooling, Behr Hella Service now primarily stocks new coolant radiators, charge-air coolers, expansion tanks, low-temperature coolers for indirect charge-air cooling and exhaust gas recirculation coolers.

Special thermal management products designed for electric and hybrid vehicles also make up the new package. In this way an electric air conditioning compressor for the BMW i3, a chiller (special heat exchanger) for the Porsche Panamera and a low-temperature cooler for the BMW 225xe Hybrid play their part in enhancing the revamped range.

In the product area of fan clutches, customers can now choose between PREMIUM LINE and standard articles, picking from a selection of more than 40 products. And what is more, the service parts sector has also been significantly expanded thanks to the addition of almost 60 new screw caps for coolant radiators.

**Behr Hella Service GmbH, Schwäbisch Hall:** The joint venture between automotive parts suppliers MAHLE Behr (specialist for vehicle air conditioning and engine cooling) and HELLA (specialist for components and systems for lighting technology and electronics) serves the global independent aftermarket for vehicle air conditioning and engine cooling parts. The joint venture combines MAHLE Behr Service's activities on the independent aftermarket and the air-conditioning business of Hella's aftermarket operations. MAHLE Behr and HELLA each have a 50 per cent share in the joint venture. The combination of HELLA's global sales organization with MAHLE Behr's product expertise and the linking of activities in the field of vehicle air-conditioning and engine cooling for the parts business have brought about the logical further development of the previous cooperation between MAHLE Behr and HELLA in the field of climate control and front-end modules.
