

New Thermal Management Catalog for CVs and Transporters

Schwäbisch Hall, February 6, 2014. The new Behr Hella Service Thermal Management Catalog 2014/2015 for Commercial Vehicles and Transporters will be available from March 2014. The catalog contains information about vehicle-specific spare parts and universal parts for vehicle air conditioning, engine cooling and refrigerant oils. A new section with water pumps and water pump kits for transporters has been added. All in all, the catalog covers 34 makes of vehicle and over 500 vehicle models including the corresponding body variants. It is available in German, English, French, Spanish, Italian, Dutch, Turkish, Polish and Russian and can be obtained from dealers and trade partners or directly from HELLA.

To make it easy to use, all the parts not included in previous versions of the catalog and all the deletions and substitutions are listed separately. Specially designed symbols facilitate understanding of the various product features and ensure that the required part is quickly found. The catalog also states precisely whether the capacitor, evaporator, and interior blower are equipped with a filter-dryer, expansion valve and blower control unit respectively.

Behr Hella Service GmbH, Schwäbisch Hall: The joint venture between automotive parts suppliers Behr (specialist for vehicle air conditioning and engine cooling) and Hella (specialist for components and systems for lighting technology and electronics) serves the global independent aftermarket for vehicle air conditioning and engine cooling parts. The joint venture combines Behr Service's activities on the independent aftermarket and the air-conditioning business of the Hella aftermarket organization. Behr and Hella each have a 50% share in the joint venture. The combination of Hella's worldwide sales organization with Behr's product know-how and the linking of activities in the field of vehicle air conditioning and engine cooling for the parts business is a consistent further development of the already existing cooperation between Behr and Hella in the field of climate control and front-end modules.
